Presented By SP Solutions

Giving business teams the **power to automate** with confidence.

While eEDGEVANTAGE and VE3 are engineered for complex, high-value enterprise workflows, many organisations also need a simpler, self-service platform to manage everyday processes.

Over the years, clients have consistently asked for a solution that allows them to design, configure and manage their own workflows without the need for custom development.

is our answer!

FLOW is a lightweight, flexible workflow engine that empowers businesses to automate routine processes using intuitive, generic user interfaces without compromising control or visibility.

Zero

Custom development required to launch a workflow

Self-Service

Teams design and manage their own workflows

Built for Everyday Operations

FLOW enables organisations to quickly build and manage smaller, high-frequency workflows.

Leave request and approvals

Simple customer service requests

Customer profile maintenance for bank, insurance and brokers

Ticketing and support workflows

Internal administrative processes

With FLOW teams can define their own workflow steps, user interfaces and routing logic – giving them the freedom to automate operational tasks and eliminating reliance on engineering teams.

Built for Simplicity, Speed & Control

FLOW was designed by Dinesh Wijesinghe to deliver a streamlined automation experience that complements our enterprise-grade platforms. It provides:

Easy workflow

Configurable forms and interfaces

Rapid deployment

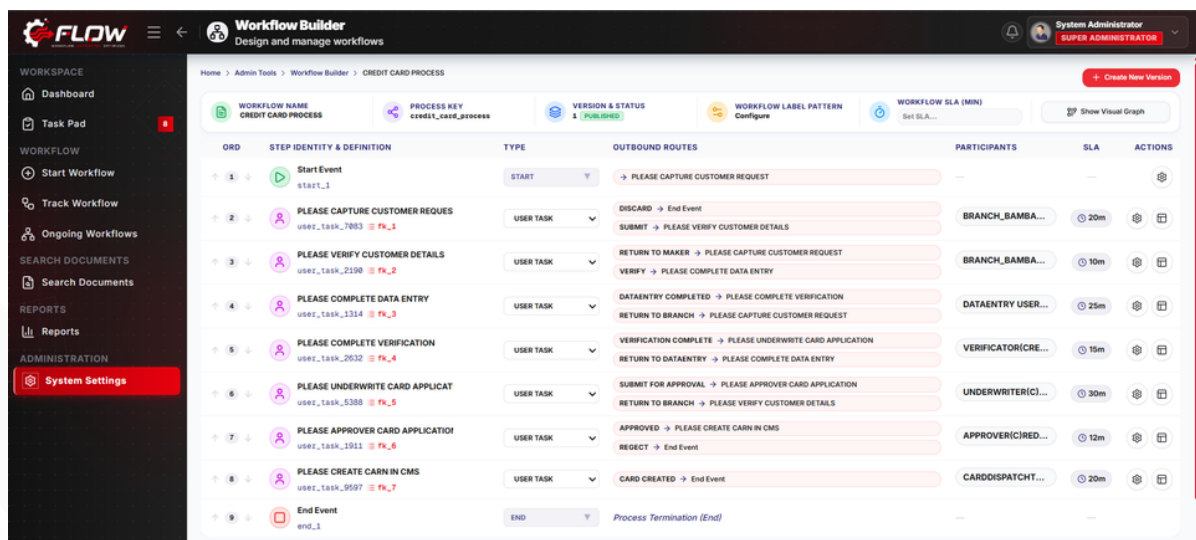

Minimal training requirements

Full visibility into process status and performance

This makes FLOW ideal for organisations that are looking to empower internal teams while maintaining governance and consistency.

ORD	STEP IDENTITY & DEFINITION	TYPE	OUTBOUND ROUTES	PARTICIPANTS	SLA	ACTIONS

Ready for Customer Trials & Deployment

We are excited to roll out flow to some of our large institutional clients and to any new clients who are interested in managing their own workflows and implementing projects within their businesses.

The platform is designed to sit alongside VE3 and Edgevantage, giving clients a complete automation ecosystem, from simple DIY workflows to the most complex enterprise processes with multiple integrations.

Let's **simplify** your everyday workflows.

Get in touch and see how quickly your teams can automate everyday processes with FLOW.
