Presented By SP Solutions

Redefines enterprise **workflow automation** with **AI-powered** intelligence, scalability, and real-time operational visibility

VE3 is our next-generation workflow automation engine, purpose-built for the AI era. Designed by Jehan Bastians and co-engineered with Dinesh Wijesinghe and Sachintha Kariyawasam, VE3 brings together more than 25 years of workflow innovation into a modern microservices-based platform capable of powering highly intricate, high-volume enterprise operations.

Developed during Jehan's transition to Australia in 2023, VE3 marks our expansion into the Asia-Pacific region — delivering AI-infused workflow solutions that surpass the capabilities of our earlier eEDGEVANTAGE platform.

managed

AI-Infused Microservices Architecture

VE3 is built on a robust microservices architecture designed for scalability, resilience, and rapid deployment. The platform was first deployed to manage the retail banking workflows of Standard Chartered Bank, forming the foundation for a full migration of SCB's workflow ecosystem to VE3 platform.

With VE3, Your Organisation Gain;

AI-powered workflow
execution

Enhanced employee
productivity through
intelligent automation

Real-time service level
monitoring

Consistent delivery of
customer-centric
business outcomes

Advanced Reporting, Dashboards & Data Intelligence

VE3 introduces a significantly upgraded visual analytics layer, offering:

**High-fidelity
dashboards**

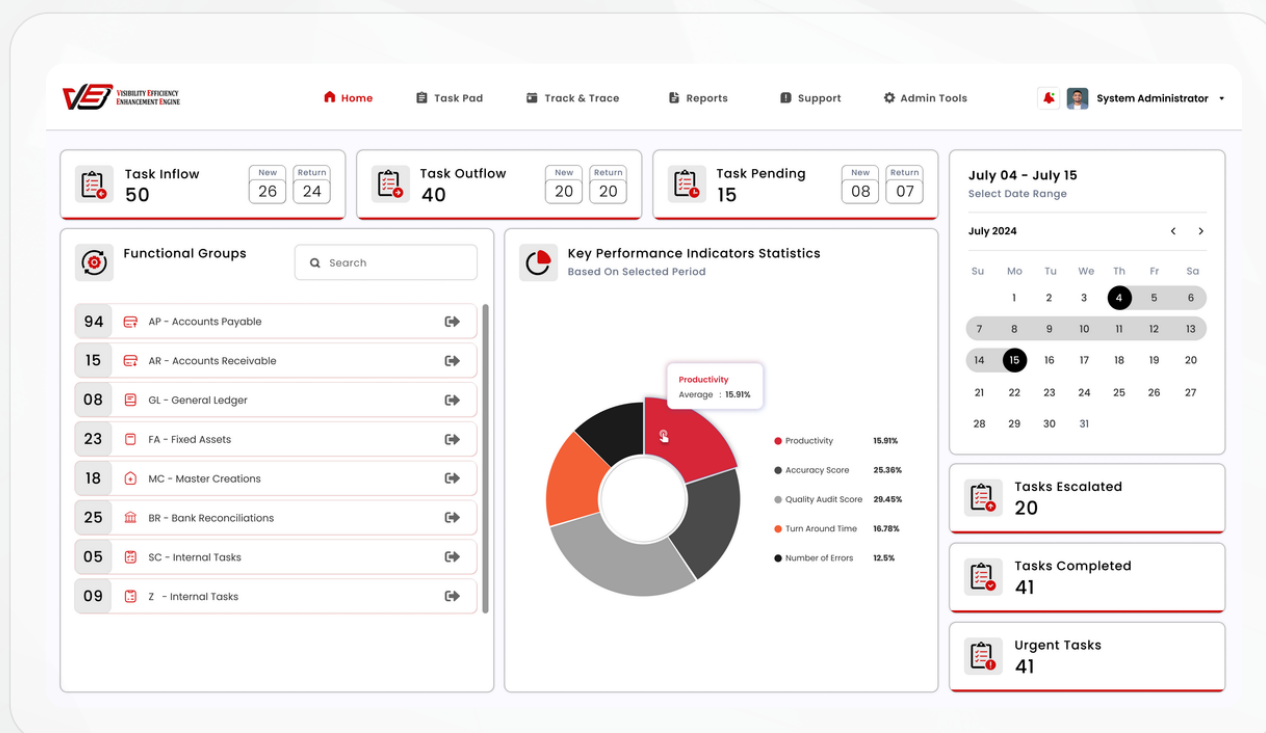

**Single-glance
operational insights**

**Large-volume
data processing**

**Real-time performance
visibility across
business units**

“

**Empowers leaders to make faster,
more informed decisions with
clarity and confidence.**

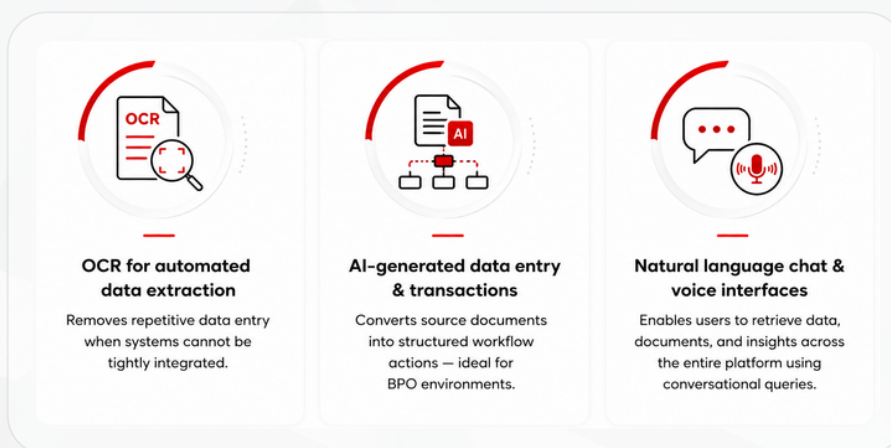

”

AI Capabilities That Transform Operations

VE3 integrates practical, high-impact AI functions that eliminate manual effort and accelerate throughput:

With VE3, organisations gain:

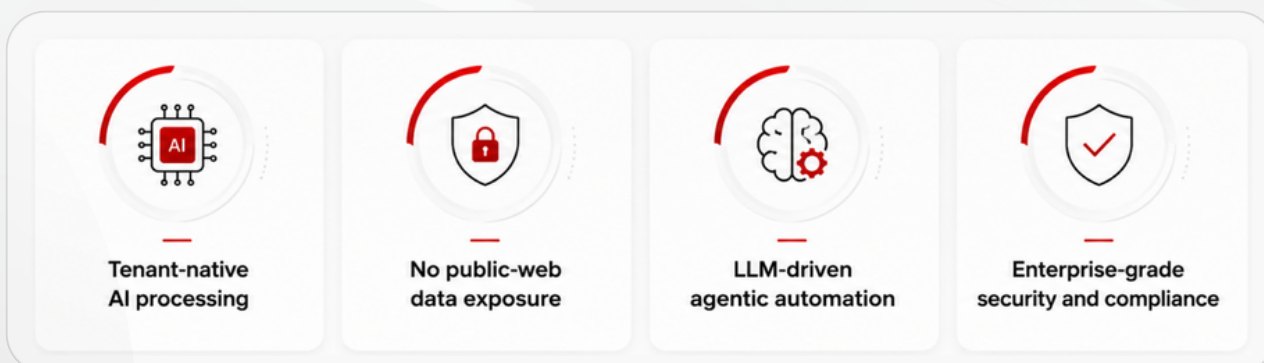

Powered by Oracle 26AI — Secure, Private, Tenant-Native AI

The most advanced version of VE3 runs on the Oracle 26AI database — the same AI-ready engine designed by Oracle for their flagship Oracle Fusion ERP.

ORACLE

This architecture allows us to deliver:

Clients benefit from powerful AI capabilities without compromising data sovereignty or privacy.

Endless Workflows, **One Platform**

"If it involves approvals, documents, or data — VE3 can automate it."

Banking & Financial Services

- Credit Card Application & Approval
- Mortgage/ Home Loan Origination

* And many more...

TRUSTED BY INDUSTRY LEADERS

Built for **2026** and Beyond

VE3 leverages a modern 2026 technology stack, delivering:

Faster
performance

Greater
stability

Higher
concurrency

Long-term
platform continuity

We now use supervised AI throughout the development lifecycle to accelerate delivery timelines and automate functional testing.

Every solution is still validated by our internal QA and BA teams to ensure intuitive, human-centred usability.

Let's **build** what's next.

Get in touch to see how VE3 can bring AI-infused, tenant-native workflow automation to your organisation.
